PROJECTS

All my projects are in my portfolio (04/2020 - Present)

- Portfolio

Weather App

- Weather application uses openweather API, tracks your location, one can also type their location or search any location to see the weather conditions at the time of using it.

ToDo App

- A to do application where one can post their to do list, edit them, delete them and also add others.

GitHub Finder

- A GitHub application that uses GitHub API to find the GitHub users, their profiles including number of repositories and followers one has, if they can be hired or not and a chance to visit their profiles in GitHub.

Femcode Africa Site

- Site used to sign up and automatically email mentors and learners upon registration. Femcode Africa is virtual Learning Software startup for women interested in learning technology skills. Also offers software solutions to clients.

Point of Sale(In progress)

- a place where a customer executes the payment for goods or services and where sales taxes may become payable. A POS transaction may occur in person or online, with receipts generated either in print or electronically. Cloud-based POS systems are becoming increasingly popular among merchants.
